Case Studies

Client A large US law firm

Description Evalueserve drafted a memorandum of law (in IRAC) to juxtapose the position of the law with the court's viewpoint on similar facts and circumstances in a given case.

Result An in-depth memorandum of law was created using research tools such as Westlaw, wherein cases were identified and shepardised to ascertain an accurate and updated position of the law.

Value The research provided an updated position of the law, thereby allowing the firm's attorneys to strategically plan cases based on the research.

Client A leading technology company

Description A team of legal professionals with domain expertise provided contract review and limited negotiation support, in accordance with stipulated parameters and guidelines.

Result The support established stringent quality measures, ensured timely availability of all reviewed contracts and streamlined the workflow.

Value Enabled the client to substantially reduce costs and avoid penalties due to non-compliance of contract clauses.

Client A leading US law firm

Description A team of lawyers, chartered accountants and engineers were required to review, analyse and categorise over 100,000 email documents using the software Concordance.

Result The project was completed within two weeks, with an in-depth analysis and categorisation of several email documents.

Value The time difference created a 24/7 work day, which increased the law firm's efficiency, expedited the review process and lowered the costs.

Client Am Law 30 US law firm

Description The client wanted Evalueserve to analyse the business model of a non-public architectural services firm for a potential takeover bid.

Result Evalueserve conducted a detailed analysis of the company's business activities, key stakeholders, industry position, acquisitions, management changes, business strategy, media presence, etc.

Value It enabled the client to ascertain risks and liabilities of the take-over bid and identify potential areas of expansion.

Evalueserve Advantage
